WELCOME

Welcome to Grease Monkey

We started with one simple idea: cycling should never be a hassle. From that one belief grew a UK-wide range of active travel products, services and consultancy - all designed to make every journey easier, smoother and a bit more fun.

ABOUT GREASE MONKEY

Born from a passion for hassle-free cycling

We're more than a manufacturer of cycle storage solutions. We're cyclists, city residents, parents, commuters and advocates for a cleaner, healthier future. Grease Monkey started as a small service centre in Edinburgh, working directly with riders and seeing first-hand the everyday challenges of keeping a bike safe, maintained and ready to go.

From there we built our first repair station to support cycling in public spaces, and that real-world experience grew into the active travel product range we manufacture today. Now operating from two UK sites - Livingston, Scotland and Hatfield, England - we design, manufacture and install secure cycle infrastructure for local authorities, developers, housing providers and private clients across the UK and overseas.

What sets us apart is that everything we design is informed by how people actually use it. We focus on accessibility, durability and long-term performance - because good infrastructure should make cycling easier, not more complicated. Our goal is simple: to support active travel by creating products that people trust, enjoy using and rely on every day.

"Our passion for cycling goes beyond the bike. We're committed to developing environments that make active travel part of everyday life. By removing barriers, we're making cycling more accessible - putting people and the planet first."

David Wray

Managing Director, Grease Monkey

WHY CYCLING INFRASTRUCTURE MATTERS

Infrastructure that does more than store a bike

We believe great cycling infrastructure removes barriers, encourages active travel and helps create more sustainable communities. That belief drives everything we design and deliver.

One of the biggest barriers to cycling isn't willingness - it's confidence. People are far more likely to cycle if they know their bike will be safe, easy to access and protected from the weather.

Good infrastructure also plays a vital role in inclusivity, with level access, intuitive design and safe locations ensuring cycling is available to a wider range of users. And when it's specified and installed correctly, infrastructure directly supports local authority active travel strategies, public health goals and national sustainability targets.

WHY IT MATTERS — FIVE OUTCOMES

Five outcomes that drive everything we deliver

- | | | |
|----|---------------------------|--|
| 01 | Supporting active travel | Encourages everyday cycling and helps remove the barriers that prevent people from choosing to cycle. |
| 02 | Health & wellbeing | Promotes physical activity and healthier lifestyles, and supports mental wellbeing through active travel. |
| 03 | Environmental impact | Reduces car dependency and congestion, lowers carbon emissions and supports local and national sustainability targets. |
| 04 | Accessibility & inclusion | Supports inclusive design through safe, level access and encourages use by less confident or occasional cyclists. |
| 05 | Long-term value | Increases usage of cycling infrastructure and delivers long-term value for public and private investment. |

ABOUT

One family of products. Endless configurations

From individual household storage to large-scale public hubs, every product in the Grease Monkey range is designed, built and installed in the UK - built on the same four principles of Security, Usability, Capacity and Adaptability, and backed by our 10-year guarantee and hands-on aftersales service. With optional upgrades, our solutions can be tailored to meet the needs of any setting.

VeloBoxes

VeloHub

OUR PRODUCTS

VeloBoxes

Secure on-street cycle storage

SOLD SECURE DIAMOND

SECURED BY DESIGN

10-YEAR GUARANTEE

Our on-street cycle hangar, available in two sizes. The flagship VeloBox secures 6 bikes in the footprint of half a car parking bay (12 bikes per bay when paired) — our most widely-deployed model for residential streets, transport hubs and busy urban schemes. The compact 4-bike VeloBox Mini takes half the space, fitting two units in a standard parking bay - ideal for tighter sites, conservation areas and narrower pavements. Same security platform, same engineering, same 10-year guarantee. Specified, built and installed in the UK, and made to last.

FEATURES

- The standard VeloBox stores up to six bikes per unit, while the VeloBox Mini accommodates up to four
- Two units can be installed within a standard 2.4 x 4.8m parking space, maximising on-street capacity
- Largest door opening height on the market (2m) - easy bike loading
- Sold Secure Diamond accredited
- Alternating high/low wheel holders prevent handlebar clashes
- Gas struts positioned clear of bikes; 50,000-cycle tested; Oilite self-lubricating bushings
- Tamper-proof, drill- and grinder-resistant locking with protected internal locking rods and 15 mm stainless steel lock protection
- Fully galvanised steel frame (BS EN ISO 1461) with stainless steel fixings
- Featuring internal Sheffield-style locking racks with quiet, one-hand door operation

Adaptations: Cargo VeloBox, VeloBox Parklet, EICR-compliant e-bike charging, digital/keyless access, master-key systems

BENEFITS

- Reclaim car parking for cycling without losing capacity
- Top-tier independent security accreditation residents can trust
- Resident-friendly: one-hand operation, quiet door, accessible to all abilities
- Future-proof: convertible for cargo bikes, adapted bikes and mobility scooters

OUR PRODUCTS

VeloHome

Secure household bike storage

SOLD SECURE DIAMOND

SECURED BY DESIGN

10-YEAR GUARANTEE

Our domestic storage solution, bringing the same engineering and security as our public-realm products into a unit designed for the home. Ideal for new-build developments, retrofit housing schemes and individual homeowners who need a weatherproof, secure place to store bikes outside the front door.

FEATURES

- 2-bikes fit comfortably
- Sold Secure Diamond accredited
- Fully enclosed, weatherproof construction. Galvanised sheet steel with a strong powder coated finish.
- Generous internal sizing - fits a wide range of bike styles
- Customisable cladding: recycled composite, timber, or biodiverse sedum green roof
- Optional internal shelving for helmets, panniers and accessories
- One-hand operation; quiet door action; same locking platform as VeloBox
- Twin unit available for public rental use.

Adaptions: EICR-compliant e-bike charging and digital/keyless access

BENEFITS

- Frees up hallways, sheds and garages for the things they were built for
- Encourages cycling by removing the daily friction of bringing a bike out of the house
- Designed for gardens, terraces and small communal spaces
- Long-term value - 10-year guarantee, fully recyclable steel and repairable parts

OUR PRODUCTS

VeloRepair

Keep cyclists rolling, wherever they ride

AVAILABLE IN THREE GENERATIONS

10 YEAR GUARANTEE

A self-service maintenance station that brings every essential tool, an integrated pump and a bike support into one self-contained unit. Designed for cyclists of all abilities - and perfect for university campuses, offices, train stations, town centres and busy cycling routes where on-the-go repairs are part of everyday cycling.

FEATURES

- Integrated track pump with high-pressure hose and dual-head valve adapter
- 9 secure tools: Allen keys, flat & cross-head screwdrivers, tyre levers and chain tool
- Tools tethered with security cables to prevent loss
- Wheel-holder bike support arm - keeps the bike steady, hands free, for chain and brake adjustments
- QR codes link directly to how-to video tutorials - no expertise required
- Custom powder-coat colours to match local authority, campus or operator branding

BENEFITS

- Removes one of the biggest barriers to cycling - confidence to handle small mechanical issues mid-journey
- Visible commitment to active travel that staff, students and residents see every day
- Low whole-life cost - robust UK-manufactured construction, replaceable components

OUR PRODUCTS

VeloHub

Walk-in modular cycle hubs from 10 bikes upwards

10 YEAR GUARANTEE

For workplaces, campuses, schools, transport interchanges and large residential schemes - VeloHub is our walk-in, modular cycle hub. Scaled from 10 bikes up to large multi-hundred-bike installations, and configurable around the site rather than the other way round.

FEATURES

- Modular construction - scales from 10 bikes upwards, expandable over time
- Galvanised steel frame with cladding options including timber, mesh, perforated steel or sedum living roof
- Sheffield-style internal locking racks; double-tier options for maximum density
- Integrated outdoor pumps and VeloRepair stations available
- EICR-compliant e-bike charging integration
- Digital/keyless access, RFID, card or app entry
- Type S Secure Cycle Shelter variant for open-access settings

BENEFITS

- Demonstrate cycling commitment in BREEAM, WELL and active travel planning frameworks
- Encourage staff, student and resident cycling with secure and weatherproof storage
- Site-flexible with adaptability to awkward footprints, tight corners and phased rollouts
- Biodiversity gains through sedum roof option - supports ESG and BNG targets

VeloSheffield

10 YEAR GUARANTEE

A toast rack cycle stand offering a simple, durable solution for secure, organised bike parking in public, commercial, residential and educational spaces.

Made from robust galvanised steel for long-lasting, all-weather performance, each stand features a practical hoop design that allows bikes to be easily locked and secured.

Available in 2 to 6 hoop configurations, with optional powder-coated finishes for added customisation and visual integration.

VeloCorral

10 YEAR GUARANTEE

A modular, customisable parking corral system designed for shared hire bike parking. It provides clear, safe, and organised hire bike parking in public spaces, with standard sizes available in 4.5m and 9.5m.

By creating a defined and professional parking zone within public realm environments, it helps reduce pavement clutter and improve accessibility in busy areas. It also supports safer streets by giving hire bikes a dedicated, predictable place to be parked.

WHAT SETS US APART

Four reasons that show up on every site

Why specifiers, councils and developers choose Grease Monkey.

01

Security

More than just the accreditation. Every bolt, panel and lock component is specified to resist real-world attack methods - master-key systems, drill- and grinder-resistant cylinders and 15 mm stainless steel lock protection as standard. Sold Secure Pedal Cycle Diamond and Secured by Design approved.

02

Usability

Designed for everyday use, for cyclists of all abilities — and for neighbours too. One-hand operation, quiet door action, alternating high/low bike positions and full-width interiors mean no one is fighting with door struts or frame work.

03

Capacity

Engineered to maximise storage within the smallest possible footprint. 12 secure bike spaces in a single 4.8m car parking bay - more bikes per square metre than any competitor.

04

Adaptability

Every unit can be adapted to fit the site, the users and the bike types - including cargo bikes, e-bike charging, mobility scooters, digital access, custom cladding and integrated seating or planters.

SUSTAINABILITY

Sustainability sits at the heart of everything we design

From how products are manufactured to how they perform over their lifetime, sustainability is built in. We design from fully recyclable, responsibly-sourced steel; minimise materials without compromising on security or durability; and plan every unit to be maintained, repaired and adapted — extending service life well beyond the 10-year guarantee.

100%

Made in the UK

Every product designed, manufactured & installed by our team.

10_{year}

Guarantee

Independent assurance on every unit, with replaceable parts.

0

Plastics since 2020

Fully recyclable, responsibly-sourced steel construction.

CASE STUDIES

Trusted to deliver, at scale

We've been chosen to design, supply, install and maintain cycle infrastructure for councils, universities, housing providers and businesses across the UK. Here are a few of the projects we're most proud of.

CASE STUDIES

London Borough of Hackney

Hackney is one of the UK's most cycle-friendly boroughs, and we've been a key partner in scaling its on-street cycle parking provision. Appointed to manufacture, deliver and install 675 VeloBoxes over two years, the programme passed the 1,000-hangar milestone, doubled on-street cycle parking capacity in three years and now serves over 6,000 residents who lack the space to store bikes at home. We also trained the Hackney Council team to maintain the VeloBox fleet - building long-term capability.

1,000 Hangers **675** VeloBoxes **6,000** Residents

CASE STUDIES

Edinburgh Council

Working in partnership with City of Edinburgh Council, we have supplied and installed VeloBoxes across Edinburgh, including on the Royal Mile, to increase secure on-street cycle parking.

We also manage the Council's rental scheme and provide ongoing maintenance, supporting the long-term success of the network.

Aberdeen City Council

VeloRepair stations installed across Aberdeen to make on-the-go bike maintenance easier for cyclists across the city.

Wheatley Group

A long-standing partnership since 2019 with Scotland's largest housing, care and property management organisation.

Newbattle Abbey College • Whinpark Medical Centre • Braehead Primary School

Secure cycle parking and active travel facilities for campuses, healthcare staff and schoolchildren - proof that the same principles scale from public-sector procurement down to individual community projects.

OUR SERVICES

A complete end-to-end service that keeps active travel moving

From enquiry to install and everyday use, our expert team takes care of the details so you don't have to. Every product is positioned safely, regularly maintained and supported by hands-on aftercare — for optimal security and long-term durability.

Installation

Our fully trained teams provide a complete installation service for cycle infrastructure on your behalf - from site survey and groundworks through to commissioning. Full UK coverage from our two regional bases.

Rentals Management

Our veloboxes.cc platform lets councils, housing associations and private operators offer secure storage as a fully managed service. Residents book and pay online; operators get waiting list visibility, demand analytics and key management and digital access across every unit.

OUR SERVICES CONTINUED

Expertise that goes the extra mile, every time

Specialist consultancy and ongoing maintenance to make sure your cycle infrastructure performs from day one and continues to perform for years to come.

Consultancy

Specialist consultancy for councils and organisations planning smarter, user-friendly cycling schemes. We help you select sites, size capacity and avoid the costly common mistakes we see across the UK - drawing on years of real-world install experience.

Maintenance & repair

Annual, 6-monthly or 3-monthly visits to suit site usage and budget, keeping every unit performing at its best for years to come. Full inspection against operational and safety standards, repairs carried out using Grease Monkey components, and backed by our 10-year product guarantee. Also available: the veloboxes.cc rental and key-management platform, which lets councils, housing associations and private operators offer secure storage as a managed service.

Two UK sites. One team

We design, manufacture, install and maintain from Livingston and Hatfield, giving us full UK coverage and the capacity to deliver projects at scale across Scotland, England, Wales and overseas.

Edinburgh, Scotland - HQ

5 Napier Square, Houston Industrial Estate, Livingston, EH54 5DG

Hatfield, England

Unit 14, The IO Centre, Hearle Way, Hatfield, Hertfordshire, AL10 9EW

Independently accredited

ISO 9001 · ISO 14001 · Sold Secure Diamond · Secured by Design · Living Wage Employer
